

# Design a Butterfly

*(Created using 'Butterfly Ornament kit' from Roylco)*

1. Design your color diffusing wings by using watercolor paint, washable markers, or food coloring. Spray water onto the wings to watch the colors separate and mix, creating cool effects. Note: If using food coloring or watercolor paint, lightly wet the wings before coloring. If using markers, color before wetting the wings.
2. After color diffusing wings have dried, now it's time to thread them through the body. Fold the wings like you would fold a fan (accordion style) to get it small enough to fit. Once through, carefully begin to spread the wings back out.
3. Thread the wax-coated string through the hole in the head. Create your own antennae design or make a curl by wrapping it around a pencil.
4. Display or hang butterfly to enjoy!
